

Nurturing resonant relationships in all things

Mission

Creating personal and group experiences of resonance for collective transformation

Experiences

- We create, share and inspire physical experiences of natural resonance.
- We offer a series of concerts & events as an expression of our mission for creating a resonant community. Our *Cave Concerts* are in Hawk Hill Tunnel overlooking the Golden Gate Bridge. Our monthly *Kirtan Community* and *Natural Resonance* concerts are in the homes of hosts and partner yoga studios.
- We offer a workshop, *The Resonant Body Experience** as a reliable method for remembering who we truly are through entering a river of resonance we produce in our own body. Workshops are available for both intuitive musicians (everyone) and practicing musicians seeking a transformational experience through sound. Learning our “SoundWorld” meditation form is part of this workshop.

Education & Collaboration

There is an almost limitless village of approaches for experiencing life more authentically. We are developing a physical space -The Resonance Institute - where science, art, earth and spirit meet for direct experiences of resonance as a way of life. Here we investigate how form comes into being through vibrational resonance, as a model for living. We bring together the eastern focus on resonance with the western emphasis on chords and narrative musical journey for new techniques, sound and approaches. We see a potential collaboration with Ken Wilber’s *Integral Theory* movement, and we promote green economy & energy awareness through articulation of green music principles.

What does the **Green** in Green Music Network mean?

Green represents an emphasis on acoustic sounds and earth based instruments. We focus on nature’s proportional resonance as a model for living. We play with musical resonance as a tool for the transformation of consciousness leading to a world culture wherein our human footprint is resonant with the earth.
